

Install USB webcam application

The device driver for the USB camera should already come with Raspian OS. We will install a USB webcam application (Cheese) so we can see live videos.

1. Take the USB Camera out of PiCar kit and plug into Pi computer's USB port
2. Run `sudo apt-get install cheese` from the terminal to install "Cheese", the camera viewer.

```
pi@raspberrypi:~ $ sudo apt-get install cheese -y
Reading package lists... Done
Building dependency tree
Reading state information... Done
....
cheese is the newest version (3.22.1-1).
```

3. Launch Cheese app by `Raspberry Pi button(Top Left Corner)` -> `Sound & Video` -> `Cheese` You should see a live video feed displayed like the picture above.
